

## WHY DO WE LEARN ENGLISH AT SCHOOL?

Hello! My name is Lilly and I had been asking myself that question for three years when I was a student at Arnoldi grammar school. One day, however, a sudden realization struck and made me embark on my personal English journey. After graduation, I started studying to become a true language expert in order to inspire others for one of the foundations of life: communication.

### **Motivation is the first step to learning something new!**

In the course of my teaching career, I have met many teenagers who struggled to learn English as they did not understand why it was necessary. For that reason, this seminar will explore the intention behind English as a school subject. Together we will discuss the purpose of language acquisition, critically analyze teaching techniques, and develop new strategies to increase motivation.

The language of this seminar is **English**. As we will discuss current topics and work with authentic language material, this course will challenge and foster all language skills: speaking, reading, writing, and English in

use! The course is designed for learners of all classes and ages who seek purpose and motivation in their English journey.

**Let's tap into the mindsets of successful learners and offer hands-on advice for making English classes as well as self-study more stimulating and fun for both students and teachers.**
